# Palwinder Singh Sangha

Salem, OR | 661-370-1971 | Palwinder4Sangha5@proton.me | LinkedIn | GitHub

## SUMMARY

Software developer with hands-on experience across web application development, cloud services, and SQL data work in business, university, and government environments. Built and deployed an ASP.NET Core application on Azure with MS SQL Server and third-party API integration, and owned work from requirements through production, including a live website migration where customer portals stayed available throughout the cutover.

## EDUCATION

**B.S. in Computer Science, Minor in Data Analytics**, Western Oregon University, Monmouth, OR (3.8 GPA) *June 2025*

## EXPERIENCE

**Independent Contractor (Self-Employed)**, AI Model Evaluation, DataAnnotation Platform *July 2026 – Present*

- Evaluate large language model outputs against task specifications, including tool-use behavior and API call sequencing, and write Python for technical evaluation tasks.

**Software Engineer**, Impressions in Ink *January 2026 – July 2026*

- Assisted in migrating the shop's legacy website to a custom in-house platform through a live, incremental cutover with customer portals available the entire time.
- Wrote MySQL queries against client and order data to rank customers by activity and annual spend, setting the migration order so the highest-value clients moved first.
- Resolved customer portal and access issues in real time as changes shipped to production, keeping customers informed and satisfied through the transition.

**Web Developer**, Courthouse Club Fitness *June 2025 – January 2026*

- Rebuilt a bloated legacy WordPress site onto a fresh install, improving page load times and retiring stale and broken pages that were still live.
- Used Google Analytics traffic data to decide which pages to keep, merge, or retire so the cleanup was driven by real usage rather than guesswork.
- Built custom WordPress plugins in PHP, translated Adobe XD mockups into responsive cross-browser pages, and partnered with marketing in daily stand-ups to ship updates and campaign launches on schedule.

**Student Developer**, Western Oregon University Computing Solutions (UCS) *June 2024 – June 2025*

- Built and maintained university web applications in HTML, CSS, JavaScript, and React with cross-functional teams, from requirements gathering through delivery.
- Created data-driven applications against Oracle REST Data Services (ORDS) REST APIs and designed user interfaces for university projects.
- Built Google Analytics dashboards on portal usage to prioritize which applications to migrate first from Self-Service Banner 8 to Ellucian Experience and to surface technical debt.

**Electronics Assembler (Contract)**, Garmin, Through-Hole Technology *March 2023 – May 2023*

- Assembled and tested aviation circuit boards to rigorous quality standards from complex technical specifications.

**Support Services Intern**, City of Salem, IT Department *July 2021 – April 2022*

- Automated routine IT tasks with PowerShell scripts, cutting manual work for the support team, and resolved hardware and software issues for city employees through help desk support.

## PROJECTS

**Trust Trade, Social Trading Platform**, Senior Capstone (GitHub)

- Developed a social trading platform using ASP.NET Core MVC (C#), Azure App Services, and MS SQL Server, designing the schema and T-SQL queries behind real-time portfolio updates and social interactions.
- Integrated secure financial data through the Plaid REST API, enabling users to connect and showcase their trading portfolios.
- Set up the CI/CD pipeline and automated testing with Selenium and Gherkin-style BDD scenarios, and owned the repository and code review process.
- Led the team as product owner and scrum master while contributing code, running sprint planning and retrospectives and managing Jira tickets.

**RSVP & Event Site**, Full-Stack Web App (Personal Project)

- Built a full-stack RSVP and event website end to end, from a vanilla HTML/CSS/JS frontend to a Node.js serverless backend on Vercel.
- Built a Supabase (Postgres) backend for RSVP storage and integrated Resend for automated email, with server-side validation and spam prevention (honeypot fields, timing checks, request throttling) on the public endpoint.

## TECHNICAL SKILLS

**Languages & Frameworks:** C#, JavaScript/TypeScript, Python, SQL/T-SQL, PHP, PowerShell, C++, HTML/CSS; ASP.NET Core MVC, React, Node.js, WordPress

**Cloud & Databases:** Azure (App Services, SQL Database, Storage), MS SQL Server, MySQL, Supabase (Postgres), Oracle REST Data Services (ORDS), Vercel

**Practices & Tools:** Git, CI/CD, Selenium, BDD/Gherkin, REST APIs, Jira, Agile/Scrum, Adobe XD, Google Analytics
